AUTHORITY OF THE LEGISLATIVE ASSEMBLY.

VICTORIA, B.C.:
Printed by WILLIAM H. CULLIN, Printer to the King's Most Excellent Majesty,
1920.

DEPARTMENT OF AGRICULTURE,

VICTORIA, B.C., May 3rd, 1920.

To Colonel the Honourable EDWARD GAWLER PRIOR,

A Member of the King's Privy Council for Canada,

Lieutenant-Governor of the Province of British Columbia.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith Bulletin No. 84, entitled "Agricultural Statistics, 1919," which has been compiled by G. H. Stewart, Statistician, Department of Agriculture, under the direction of Dr. D. Warnock, O.B.E., Deputy Minister.

I have the honour to be,

Sir,

Your obedient servant,

E. D. BARROW,

Minister of Agriculture.

DEPARTMENT OF AGRICULTURE,

VICTORIA, B.C., May 3rd, 1920.

Hon. E. D. Barrow,

Minister of Agriculture, Victoria, B.C.

SIR,—I have the honour to submit herewith for your approval Bulletin No. 84, entitled "Agricultural Statistics, 1919," which has been compiled by G. H. Stewart, Statistician, Department of Agriculture.

I have the honour to be,

Sir,

Your obedient servant,

D. WARNOCK, O.B.E.,

Deputy Minister of Agriculture.

ACKNOWLEDGMENTS.

Grateful acknowledgments are tendered to the following for valuable co-operation in supplying data contained in this bulletin: Various produce merchants for data relating to imports from other Provinces in Canada; Dominion Express Company and Canadian National Express Company for data showing express movements of fruits and vegetables; F. Napier Denison, Superintendent, Meteorological Observatory, British Columbia, for meteorological data; and Department of Customs, Ottawa, for statements relating to imports from foreign points.

INTRODUCTION.

THIS bulletin contains statistics of the agricultural industries of the Province of British Columbia. These statistics relate to areas of land under crop and under cultivation; production of the various crops; animals, animal products, and climate as affecting agriculture. Included also are statements relating to express movements of fruits and vegetables and imports of all agricultural food products.

The data shown for 1917, 1918, and 1919 relating to the areas of field crops and numbers of live stock were determined by means of a postal census in June, taken through the joint efforts of the Dominion and Provincial Governments.

The total number of farmers, or separate farms, in the Province, according to a registration taken in 1918 by the Dominion Registration Board, was 15,146. This total does not include farmers' sons. Of the total farmers, 58 per cent. responded to the inquiries sent out. The percentage of returns received this year stands higher than from any other Province in the Dominion and the highest on record in British Columbia.

It appears from the returns received that the farmers of this Province are beginning to realize the importance of rendering full and accurate returns to this office, and it is only a matter of a short time until this work will bear the desired results in the Province of British Columbia.

AGRICULTURAL STATISTICS, 1919.

SYNOPSIS OF AGRICULTURAL CONDITIONS IN BRITISH COLUMBIA, YEAR 1919.

As far as the agricultural industry in the Province of British Columbia is concerned, the year 1919 was the most successful year on record. The total agricultural production was $65,384,556, as against $40,444,308 for the year 1918, representing an increase in the total value of 32.23 per cent. over the previous year and 717.30 per cent. over the year 1900, when statistics were first collected in British Columbia.

This large increase may to some extent be attributed to the prevailing high prices, yet a general increase may be noted in practically all branches of agriculture, more particularly as it relates to meats, poultry, fruits, fodders, and grains.

Although total imports of food products into British Columbia show an increase of 3.78 per cent. in 1919, this increase is due to the increased prices, as the actual quantity imported shows considerable reduction over the previous year.

While figures are not available showing exports, the total value is estimated to have been $7,000,000, as against $5,000,000 in 1918, or an increase for the year of 40 per cent. The exports consisted chiefly of fruits and vegetables.

Fruits.

The fruit-crop was the largest on record. Apples and other tree-fruits produced well, while returns were most satisfactory. The production of apples alone was 94.37 per cent. greater than in 1918, while the increase in other tree-fruits was 5.23 per cent. greater. The greatest increases are to be noted in cherries, apricots, plums, and prunes. The peach-crop shows considerable reduction, through loss occasioned by early frost.

Small fruits showed a gain of 34.45 per cent. for the year. The outstanding increases occurred in strawberries, raspberries, and blackberries. The total production of all fruits exceeded the production in 1918 by 67.81 per cent.

Vegetables.

The acreage of potatoes increased 19.80 per cent. over the year 1918. The yield, however, was 11.86 per cent. less, caused chiefly through drought during the summer. A further loss was occasioned by frosts after the crop was harvested.

A marked decrease occurred in the yield of tomatoes, especially in the Okanagan Valley; this loss was due to early frosts. Greenhouse tomatoes, however, showed a large increase in production, which, together with the high prices received, increased the value of production from $52.11 per ton in 1918 to $113.76 per ton in 1919.

The area in root-crops shows an increase of 10.92 per cent. over 1918.

Grains.

The area of grain for threshing in 1919 increased 27.92 per cent. over the year 1918, whilst the total yield increased 38.68 per cent. Owing to unfavourable weather during the summer a larger percentage than usual was cut green or turned into hay, thus reducing the quantity of grain for threshing considerably. The area of fall wheat and oats shows a large increase over 1918. The prices for all grains averaged much higher than in 1918, resulting in an increase of 48.63 per cent. in total value.

Fodders.

The area sown to fodders increased 24.61 per cent. over 1918. Unfavourable weather again accounted for a marked decrease in the yield of clover and timothy.

The area of grain-hay increased 14.40 per cent. over 1918; this was due largely to so much grain being cut green or turned into hay to relieve the shortage resulting from the failure of the clover and timothy crops.

Fodder corn, while still comprising a small percentage of the total acreage of fodders, also showed considerable increase, both in acreage and yield. Clover and timothy averaged $35.25, as against $33.25 in 1918.

LIVE STOCK.

Horses decreased in numbers 414, due chiefly to the increased use of motors in the Province.

Beef and dairy cattle showed but a slight increase over the year 1918.

Owing to the large number of sheep marketed during the year the numbers decreased slightly below the year 1918.

Swine increased in numbers 12.95 per cent. during the year.

Poultry and eggs show a most satisfactory increase, both as regards quantity and value. The numbers of poultry increased 17.88 per cent. The quantity of eggs produced shows an increase of 26.44 per cent. over 1918.

MEATS.

The total quantity of all meats marketed during the year increased 8.99 per cent. The total value shows an increase of 18.43 per cent. over 1918. Pork and pork products showed the greatest gain, while mutton also showed a considerable increase.

DAIRY PRODUCTS.

The total quantity of butter manufactured increased 2.56 per cent. for the year.

The total quantity of cheese manufactured in the Province shows a steady increase. The total quantity manufactured during 1919 was 304,502 lb., as against 250,674 lb. in 1918, an increase of 21.47 per cent.

The total increase in the value of all dairy products for the year was 23.31 per cent.

G. H. STEWART,
Statistician.

May 3rd, 1920.
